Introduction

We all know that oil and water don't mix, but did you realize that combining Vitamin C with retinol is practically a formula for disaster? The active chemicals in some treatments may work better when combined, but the improper combinations may have negative consequences (such skin burns and itchiness). Depending on your skin type, there are several skincare items you should never mix. Regardless, it's critical to understand which skincare products will blend and layer effectively when selecting new ones. It may be challenging to determine which products work best together based on your skin type, so you may have to experiment. Here, Beauty Tips provides a list of skincare products that you should never combine as a guidance for your new skincare routine.

1.Project Description

Because many people are unaware of the effects of using the wrong skin care products in combination, our application (Beauty Tips) lets you know whether your product can be used with another product without causing harm based on their chemical constituents. Additionally, it displays if your product is compatible with your skin type and any issues it has, it will help you prevent future harm.

2.The targeted users:

People who are interested in skincare.

3.The Problem:

The current skincare industry lacks a comprehensive and accessible system for informing consumers about the potential risks associated with combining different skincare products. This knowledge gap poses a significant problem in the skincare routine of individuals, as improper combinations may cause harm to the skin and negate the intended benefits of skincare products. If we look carefully at the issue of the interaction of chemicals in skin care products and whether there is a program that provides the service of clarifying their harm to people, we will not find any results despite the importance of the topic.

4.The ways collect Data:

We will collect data from interview and questioner.

5.Find users:

from real world and Social Media sites.

6.Interviews Questions:

Questions for IT specialist:

1. How would you approach designing the user interface and experience for a skincare application?
2. How will you use user feedback to improve the skincare app after its launch?
3. How do you optimize the skincare app's UI for performance and responsiveness on diverse mobile devices?

Questions for Interface designer:

1. What methods do you use to understand the target audience and their needs?
2. Can you provide an example of a feature you believe is essential for a skincare app and why?
3. Can you describe your approach to usability testing in the context of a skincare app?

Questions for Someone who has been harmed due to misuse of skincare products:

1. What problems did you encounter in caring for your skin?
2. Have you consulted dermatologists or skin care experts for advice? How was your experience with them?
3. What would your impression be if there was a reliable application that would save you time and effort in asking about any skin problem?

Questions for dermatologist:

1. Why is it important to choose care products based on skin type?
2. What is the correct order of steps for a skincare routine?
3. Are there substances that interfere with skin care products?

Questions for Influencer:

1. Based on your experience, how do you think a skincare app can personalize routines for diverse skin types and concerns while ensuring safety in product combinations?
2. Engagement is key for any app's success. What features do you believe would keep users coming back to a skincare app, ensuring they follow their routines consistently?
3. Sustainability and ethical practices are increasingly important to consumers. How can a skincare app incorporate these values into its design and functionality?

6.1. Interviews Answers:

Interviewer: Ayshah

Interviewee: Mohammed IT specialist

Date: 1/20/2024

1. I would start with user research for a user-friendly interface. Then, I would ensure simplicity and inclusivity, making it responsive for all devices.
2. After launch, I will gather feedback and update the app based on users' suggestions and concerns.
3. I will prioritize performance with responsive design and thorough testing for smooth operation on all devices.

Interviewer: Gydaa

Interviewee: Ali Interface designer

Date: 1/19/2024

1. I chat with potential users through surveys and interviews, creating fun fictional characters (like personas) to help us understand their needs and desires. We also check out what other skincare apps are up to, keeping an eye on trends and what users like.
2. Think of personalized skincare routines like having a skincare best friend! They're crucial because they give each user a unique plan tailored to their skin type, concerns, and goals. It's like having a skincare expert in your pocket!
3. Testing the app is like having a friendly chat with our users. We invite a diverse group to play around with the app, watch how they use it, and listen to their thoughts. Then, we tweak things based on their feedback, making sure the app feels like a breeze to use for everyone.

Interviewer: Asal

Interviewee: Sara “Someone who has been harmed due to misuse of skincare products”

Date: 1/17/2024

1.
 - I faced issues with severe acne and frequent breakouts.
 - I struggled with hyperpigmentation and the appearance of dark spots on my skin.
 - I experienced severe dryness and flaking of the skin, especially during the winter.
2. Yes, I visited a dermatologist to seek their advice. My experience was positive as the doctor listened to my concerns attentively and provided me with a comprehensive treatment plan. But it was expensive, and the clinic was a bit crowded.
3. I believe it would be incredibly convenient and helpful. It would save me time and effort in researching skin problems and finding appropriate solutions. It would be great if the application also provided reliable and detailed information about skin issues and the suitable products for skincare.

Interviewer: Jory

Interviewee: dermatologist Fahad

Date: 1/18/2024

1. Choosing the appropriate products based on your skin type helps determine your skin care method and avoid any damage that may affect it. As there is more than one skin type, skin type can be determined through a set of characteristics that differ from one skin to another.
2. Cleanser, then toner, then serum, and finally moisturizer, and if using oil, it is in the last step.
3. Yes, there are some substances that conflict with other products Therefore, it is **recommended** to avoid Mixing them together does not bring a good result, quite the opposite, so we must check the products that do not work together.

Interviewer: Saja

Interviewee: Influencer Alice

Date: 1/20/2024

1. An effective app should start with a detailed skin assessment, including questions about skin type, concerns, allergies, and current products. It should then use this information to recommend safe and compatible products. Incorporating a feature that allows users to scan or input their current products to evaluate compatibility would add immense value.
2. Interactive features like daily skincare check-ins, progress tracking with before-and-after photos, and personalized skincare tips could boost engagement. Also, incorporating a community aspect where users can share experiences and product reviews would foster a sense of belonging and commitment to their routines.
3. An app can prioritize recommending products from brands that are known for sustainable practices and ethical sourcing. It could also include features that educate users on eco-friendly skincare routines and how to minimize waste, such as suggesting multi-use products or reminding users to recycle packaging.

2. Visualization:

هل كنت تعلم ان دمج بعض منتجات العناية بالبشرة قد تؤدي الى اضرار خطيرة؟

197 ردًا

The high percentage of participants who knew about the dangers of mixing skin care products together demonstrates the importance of being aware of the potential health risks of this type of behavior. The high percentage of those who knew about the risks of combinations shows the importance of educating consumers on how to use the correct and safe skin care products. The remaining percentage of participants who are not aware of the risks of combinations could indicate challenges in conveying information and educating the public effectively about this issue.

هل سبق وان دمجت منتجات عناية بالبشرة وعانيت بعدها من اثار سلبية؟

197 ردًا

This indicates an urgent need to increase awareness among users about the dangers of using skin care products incorrectly or inappropriately. Improving quality and safety: The relative proportion of participants who experienced negative effects after integration indicates the importance of improving the quality and safety of products available on the market, and the necessity Choose products that meet users' needs without causing unwanted side effects. These results can be used to identify target groups that particularly need additional education and support in skin care, such as those with skin allergies or other skin problems.

هل لديك اهتمام بالعناية بالبشرة ؟

197 ردًا

In this chart, out of 197 participants, 89% expressed interest in skincare, while 11% did not. This indicates a considerable demand for skincare products and services.

هل تعلم ان بعض من منتجات العناية بالبشرة تؤثر سلبيًا على النساء الحوامل؟

197 ردًا

In this chart, among 197 participants, 85% recognize that skincare products might negatively affect pregnant women, while 15% are unaware. This shows a strong interest in understanding the risks. To address this, we'll gather insights from skincare experts.

هل انت من الاشخاص المهتمين بمعرفة اضرار وفوائد منتجات العناية بالبشرة؟

197 ردًا

In this chart, it shows that 89.3% of individuals are interested in learning more about the benefits and potential harm skincare products could have on their skin. In contrast, only 10.7% are not interested. This data implies there is a strong interest among consumers for our application that provides information on the benefits and risks associated with skincare products.

هل انت من متابعي مشاهير العناية بالبشرة؟

197 ردًا

We notice that 56.3% of the participants are not followers of skincare celebrities, while 43.7% of them do follow them. This indicates a greater reliance of people on expert opinions rather than celebrities.

هل تفضل تلقي معلومات منتجات العناية بالبشرة من المتخصصين او المشاهير؟

197 ردًا

Given that 94.9% of participants prefer to receive information from skin care specialists, the application's reliance on skin care information from experts benefits the application and gives great confidence to users when using the information.

هل انت متابع لآخر اخبار منتجات العناية بالبشرة؟

197 ردًا

The chart indicates that 59.4% of people do not keep up with the latest updates regarding skincare products, while 40.6% do. This suggests that a significant number of individuals might be repeating the same mistakes with skincare product usage due to their lack of seeking out new information.

هل ترى ان تطبيق "Beauty tips" مفيد؟

197 ردًا

As shown in the figure, 73.6% believe that the application will be useful, as most people are keen to buy effective and appropriate skin care products, while the remaining percentage do not find the application useful due to their lack of awareness about the dangers of some product materials, which may lead to more harm than benefit. The problem lies in Choosing the right products: A large percentage of people are interested in the quality and choice of skin care products, so this application will provide effective skin care tips and how to deal with the correct routine that is appropriate for the age as well as for the skin.

ما هو موقفك لو كان هناك برنامج

مضمون و موثوق للبحث عن اي موضوع يخص العناية بالبشرة؟

197 ردًا

A large percentage of people agree that there should be a guaranteed and reliable application for skin care, 91.9%. With the increasing rates of searches for these products in electronic stores and smart applications, there must be a reliable and reliable application to identify suitable products and their risks, while there is a small percentage, 8.1%, who are neutralist that There is a reliable and reliable application for skin care. This may be due to their ignorance of the importance of reading products before purchasing them, because some of them may damage the skin and may contain toxic chemical substances, as the skin absorbs them and seeps into the bloodstream. Therefore, it is very important to know the ingredients of any product and its risks from a reliable and reliable application.

3.Needs, Insights and Tasks:

1-

Need: Users want to comprehend the potential risks and benefits associated with skincare product combinations.

Insight: Users are aware of the risks associated with skincare product combinations, indicating a level of concern about product safety.

Task: Provide comprehensive information on skincare product compatibility and potential risks, enabling users to make informed decisions about product combinations.

2-

Need: Users seek convenient access to reliable information about skincare product compatibility and safety.

Insight: Users show significant interest in information about the safety of the combining products in their customized skin care routine, indicating their need for a feature in the program to assess their own routine and provide advice and alternatives.

Task: The program offers a feature to determine whether the product combination into the user's routine is safe, and it presents alternative suggestions in the skincare routine or better options to achieve what the user seeks.

3-

Need: Users desire to learn about the potential negative effects of skincare products, particularly during pregnancy.

Insight: Users are aware of the negative effects some skincare products have on pregnant women, indicating an interest in specialized knowledge.

Task: Curate content from skincare professionals to provide expert opinions and insights, validating users' preference for credible sources of information.

4-

Need: Users value expert opinions over celebrity endorsements when seeking skincare product information.

Insight: While users appreciate celebrity endorsements, they prioritize information from skincare professionals, indicating a preference for credibility and expertise.

Task: Deliver updates on the latest skincare product news to bridge the information gap and keep users informed about industry developments.

5-

Need: Users express a need for easy access to comprehensive research on skincare topics to make informed decisions.

Insight: Users perceive value in applications like "Beauty Tips," indicating a receptiveness to skincare-related digital tools that offer practical benefits.

Task: Develop a user-friendly interface for accessing reliable research on skincare topics, offering convenience and empowering users to explore diverse aspects of skincare with confidence.

Assignment 3:

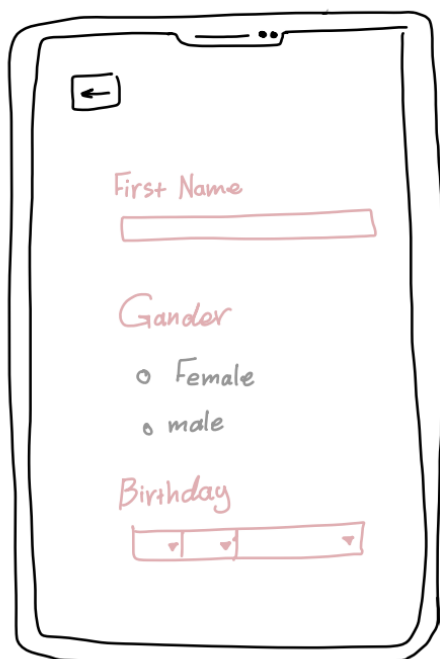

<div>Tasks</div> <div>Name</div>	1	2
Asal Al-Shehri		
Ayshah Aljaafari		
Gydaa Atiah		
Jory Bayazeed		
Saja Majid		

1. sketch

2: When the user opens the app a sign in page will show with options to sign in for already existing users or create an account for new users.

3. Create account

3: if the user chooses to create an account a page will appear with the needed to be filled user information. Such as name, gender, and birthday.

4. Female

←

Choose

- ☐ pregnant
- ☐ Breastfeeding

Skin type

- ☐ Oily skin
- ☐ Dry skin
- ☐ Combination skin
- ☐ Sensitive skin

Next

4: According to the user gender a page will show with more required information. If the user is female, she can check if she is pregnant or breast feeding. This information is critical to ensure the user with a safe and a harmless skin care routine that protects the mother and her child. also, she can choose her skin type.

5. Male

←

Skin type

- ☐ Oily skin
- ☐ Dry skin
- ☐ Combination skin
- ☐ Sensitive skin

Next

5: If the user is male, he can choose his skin type.

6: after, the rest of required information are displayed in a page. The user email and password

Beauty tips makes it very simple to toggle your way to its features. After signing in the app immediately takes you to (make your routine) page. There is an icon that you can press on to start making your skin care routine

After pressing the icon a page will appear with a menu bar that contains a drop down menu with a search field, a filtering menu item, and a code scanner menu item. The drop down menu contains the skincare products that the user can choose from like face cleanser, face cream, lip balm, and others. Another way to choose, the user can search through the filter feature or scanning the barcode of the product to create his own skin care routine.

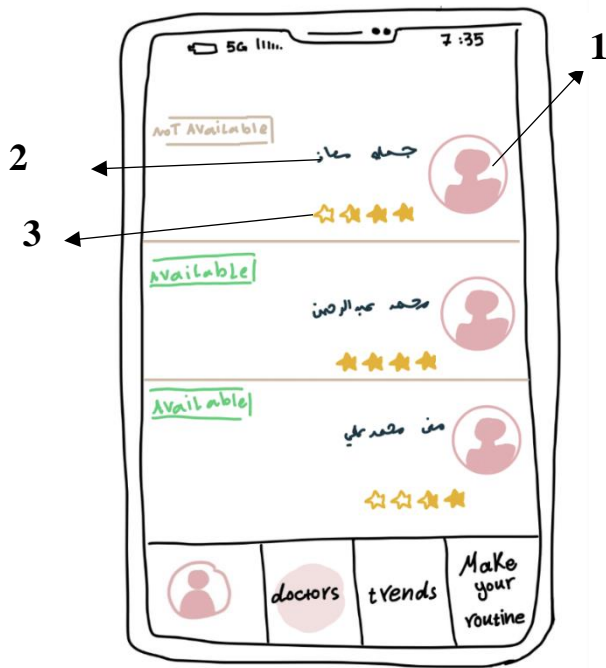

After choosing, a list and a make button will show. The list will contain the chosen products with the option to delete unwanted products.

Then a page will appear with the results if the skin care routine selected by the user is safe and suitable for the user or not. Also, a customized suggestions and tips are going to be provided to support and enhance the user skin care routine experience. If the skin care routine does isn't safe or doesn't suit the user other Alternatives are going to be suggested.

if the user clicks on the trends feature a page that will display a page with two sections the (for you) and (following) that he can tap on. The for you section works like an explorer where the user can find reviews, trending products, and other users experiences. In the following section are the user's favourite accounts

1 When the user clicks on doctors feature it will display all doctors in the system.

The doctors will display that include the number of stars that were rated, and his name appears here. It also includes availability, as if he is available, the icon will appear in green, and if he is not available, he will appear in grey (busy). It will help people reduce time and effort and choose the appropriate doctors based on people's ratings and opinions.

1-

If you click on the doctor profile you can view the doctor information like Certificates, experience, and the workplace so that the user can visit it, book an appointment, and know the working hours, or he can book an appointment online from the application. This feature makes the application convenient and efficient.

2-

If you click on the doctor's name you can chat with him and asks questions, Get suggestions.

3-

When you click on the stars for the doctor you want, the number of ratings will appear next to the stars and people's opinions and ratings. This will help people get a general idea about the doctor, which will enable them to choose the right doctor for them. This feature will make the application easy and comfortable to use.

The user will be able to click on profile personally feature it will view app settings, account, log out.

2. explaining the new design:

The initial design is easy and quick to create, with the ability to modify and change it immediately. It is also considered completely inexpensive because it relies on pen and paper, and to meet the needs of the user, this design will give more time to users during the usability test, as the user feels comfortable and not under pressure, so he is open to speaking and giving his opinion frankly. As a result, the designer can build an honest perception of exactly what the user wants.

The redesigned Beauty Tips app meets users' needs by offering personalized skincare advice tailored to individual profiles, including skin type and pregnancy status. With a built-in routine builder and product compatibility checks, users can easily select safe and effective skincare products. Trend exploration and direct access to skincare experts further enhance the user experience, ensuring informed decision-making and effective skincare routines.

Assignment 4:

2. short explanation of the designed application:

Beauty Tips is your go-to app for personalized skincare guidance. Whether you're a skincare novice or an enthusiast, Beauty Tips simplifies the process of achieving healthy and radiant skin. Upon signup, users provide basic information such as skin type and gender, enabling the app to tailor recommendations to individual needs. With a user-friendly interface, users effortlessly build their skincare routines by selecting from a wide range of products. Beauty Tips evaluates product compatibility in real-time, ensuring safe and effective combinations. Stay updated with the latest trends and recommendations and connect with skincare professionals for expert advice. Empowering users to make informed decisions, Beauty Tips advocates for healthy skincare practices and promotes responsible product choices, ensuring your skin gets the care it deserves.

Conclusion

Beauty Tips offers personalized skincare guidance to empower users in making informed decisions about their skincare routines. With user-friendly features and access to expert advice, the app aims to provide reliable information and support to skincare enthusiasts. Through continuous refinement based on user feedback, Beauty Tips strives to meet the evolving needs of its users effectively.

Suggestions for Improvement

1. Enhance User Engagement: Add interactive features like quizzes or challenges to keep users engaged and motivated.
2. Streamline User Experience: Simplify the app interface and navigation for a smoother user experience.
3. Expand Product Database: Continuously update the app's product database with new releases and user reviews.
4. Integrate AI Technology: Explore using AI to provide personalized skincare recommendations based on user preferences.
